

HOW A.D.T. KEEPS THE WATCHMAN WATCHING

**During 1934
158,247 reasons
given by
watchmen for
failures to
transmit signals**

Asleep	2,742
Intoxicated	206
Watchman gone home	1,511
Watchman sick or otherwise disabled	1,152
Overlooked time or forgot	30,457
Watchman late reporting for duty	979
Watching suspicious persons	870
Too busy	33,356
Ordered not to turn in signals	3,026
Building locked, could not get in	920
Watchman denies failure	18,609
Lantern went out	237
Refused to give excuse	16,839
Watchman missing	295
Watchman lost key	788
Weather prevented	988
Watch slow or stopped	5,263
Could not get to box on account of ob- struction	2,047
Did not report because factory was run- ning	8,426
New Watchman, did not know location of boxes	1,707
Miscellaneous	27,829
Total.....	158,247

99 ⁹⁵/100%
watchman patrol
efficiency

and

99 ⁹⁶/100%
immunity from
fire loss

This impressive total of 158,247 failures of watchmen to transmit signals represents only 5/100 of 1 per cent of the total number of signals supervised during the year—a patrol efficiency of 99-95/100%.

In the record of failures listed above, the thoughtful executive will find a significant indication of what conditions must be *without* A. D. T. Supervision.

By keeping the watchman ever alert . . . by taking over his duties when he is disabled, or for any other reason abandons his patrol of your property . . . by providing private fire alarm boxes with which to summon the fire department instantly and accurately . . . A. D. T. Supervision has accomplished for its subscribers 99-96/100% *immunity from fire loss* during the past ten years.
