134,021 ALARMS
 IN 1944
FIRE LOSS IMMUNITY
99 ⁹⁸/₁₀₀% OVER
 10 YEARS

CAUSES OF ALARMS

Waterflow (fires or serious leaks)	2,598
Closed gate valves	35,476
Low water in gravity and surge tanks	7,837
Low temperature in gravity and surge tanks	3,569
High or low air in pressure tanks	9,156
High or low water in pressure tanks	4,084
High or low air in dry pipe systems	30,329
Other abnormal conditions	40,972
TOTAL	134,021

Only by eliminating dependence upon the human element can you be sure that your automatic sprinkler system will function effectively when fire strikes.

A.D.T. Central Station Sprinkler Supervisory Service eliminates the hazards of human failures by:

1. Maintaining a continuous, automatic watch over every vital part of the sprinkler system to assure that it is constantly in proper operating condition.
2. Making the sprinkler system function also as an automatic fire alarm system to summon the fire department direct to your premises — automatically — instantly — accurately.

Any one of the alarms tabulated on the opposite page represented a condition that could have resulted disastrously if it had not been promptly detected and corrected.

A.D.T. Central Station Sprinkler Supervisory and Waterflow Alarm Service is constantly demonstrating its effectiveness by minimizing fire and water losses in thousands of sprinklered properties throughout the country. The exceptional value of this service is proved by the following figures for 1944 showing the ratio of losses to property values protected:

Insurable values of properties protected:
\$6,903,586,000.

Ratio of losses to insurable values protected:
4/100ths of 1%.

During the past ten years the ratio of losses to insurable values protected has averaged **2/100ths of 1% — 99 98/100ths% immunity** from fire and water loss.

A Nation-wide Protection Service **FIRE, BURGLARY, HOLDUP**
