**SPRINKLER SUPERVISORY and
WATERFLOW ALARM SERVICE**

142,052 ALARMS from Sprinkler Systems in 1945

Every year a large number of sprinklered properties suffer serious fire and water losses as the result of conditions, usually caused by human failures, which impair or nullify the effectiveness of sprinkler systems.

The following record of alarms received in 1945 from A.D.T.-Supervised Sprinkler Systems represents conditions which, if not promptly corrected, might have resulted disastrously.

CAUSES OF ALARMS

| | |
|--|----------------|
| Waterflow (fires or serious leaks) . . . | 2,749 |
| Closed gate valves | 37,513 |
| Low water in gravity and surge tanks . . . | 8,573 |
| Low temperature in gravity and surge tanks | 3,484 |
| High or low air in pressure tanks . . . | 9,516 |
| High or low water in pressure tanks . . . | 4,854 |
| High or low air in dry pipe systems . . . | 29,443 |
| Other abnormal conditions | 45,920 |
| TOTAL | 142,052 |

99⁹⁸/₁₀₀ % IMMUNITY from Fire and Water Loss

A. D. T. Sprinkler Supervisory and Water-flow Alarm Service has a long and enviable record in minimizing fire and water losses in thousands of sprinklered properties of all types throughout the country. This consistent performance was maintained during 1945, as attested by the following record of losses in relation to property values protected:

Insurable values of properties protected

\$7,149,469,000

Ratio of losses to insurable values

2/100ths of 1%

During the past ten years the ratio of annual losses to insurable values protected has averaged **2/100ths of 1%**—immunity from fire and water loss of **99 98/100ths%**.
